Questions

$$\begin{aligned} 1) \text{ Mean} &= \frac{\sum f_i x_i}{\sum f_i} \\ &= \frac{802}{29} \\ &= 27.66 \end{aligned}$$

$$\begin{aligned} 2) \text{ Median} &= \frac{6+6}{2} \\ &= 6 \end{aligned}$$

$$3) \text{ Mode} = 46$$

$$\begin{aligned} 4) \text{ Mode} &= 3(\text{Median}) - 2(\text{Mean}) \\ &= 3(12) - 2(27.66) \\ &= 36 - 55.32 \\ \text{Mean} - (36 - 2\text{Mean}) &= 48 \\ 3\text{Mean} &= 84 \\ \text{Mean} &= 28 \end{aligned}$$

$$\begin{aligned} 5) \text{ Mode} &= 3(\text{Median}) - 2(\text{Mean}) \\ 24 &= 3(M) - 2(60) \\ 3(M) &= 144 \\ M &= 48 \end{aligned}$$

$$\begin{aligned} 6) \text{ Mode} &= 3(40) - 2(12.5) \\ &= 30 - 25 \\ &= 5 \end{aligned}$$
